Ornamental Trees

The size immediately following the description indicates approximate height at maturity.

LARGE B & B SHADE TREES

We are specialists in balling and handling large shade trees up to 8" caliper. We recently moved over 150 truck loads of this material in full leaf to the Great Lakes Exposition grounds in Cleveland with the loss of only 3 trees. We would be pleased to quote prices for your requirements on request.

TWO NEW BUDDLEIAS Worthy of Consideration

Buddleia Fortune. Plant Patent No. 206.

A low, compact, neat growing Buddleia. Each panicle is perfectly rounded and in bloom all at once from base to tip. Flowers are of a clear and true lavender-blue. They last in water from 3 to 5 days after cutting.

During these lean years one has been apt to neglect many important duties. Root-pruning of Evergreens is most necessary yet not immediately apparent if neglected.

Cole has a regular schedule for Root-pruning — In fact, the majority of our Evergreens are Root-pruned at least every

two years.

ROSES

We add a number of thoroughly tested roses to our collection each year and at the same time eliminate a few of the least worth-while.

We endeavor to always have a very high class collection to meet all needs. (See Pages 63-67).

NORTHERN GROWN ROSES

Our trade recognizes the uniform quality, hardiness, and "trueness to name" of Cole's Painesville Grown roses. We have guarded this reputation zealously and have gone to no end of labor to see that we had an ample crop for our regular customers in the face, many times, of adverse economic, trade, and weather conditions.

We hope you will bear in mind the conditions herein mentioned when selecting your source of supply.
